- Boom Rotation 360 Degree
- 4-Wheel Steer 4-Wheel Drive
- Tight Turning Radius
- Independent Outrigger Controls

15 TON BRODERSON CARRY DECK CRANE

Bare Rent or with NCCCO Certified Operator

This piece of equipment is dual-fuel powered (gas/propane). It has a 50' main boom w/ 16' jib. With a height of only 8' x 8' wide and 4 wheel steering, this crane can be used for tight spots and indoor applications. This very versatile piece of equipment is easier to use than a Gradall with a truss boom where space is limited and will save you time and money. It is available as a bare rental or rent with an operator. We deliver to your job site and pick up when you are finished.

Let us assist you with ALL your equipment moves, heavy hauling and hoisting
